Digital television transmission (TV)

The TV is connected to a digital receiver:

The cable of the receiver is connected to the **HDMI 1** output at the back of the TV.

Take the digital receiver remote control and use the top three buttons of the control:

- By pushing the button "**STB**", you turn on and off the digital receiver.
- By pushing the button "**TV**" , you turn on and off the TV.
- By pushing several times the button "**AV**", you have to select, if necessary, the output **HDMI 1**.

A channel bar will now appear on the TV screen showing the channel number and channel name, among other things.

With the digital receiver remote control, you can now select the channels with the "Channel" button or the number keys and you can also adjust the volume (+/-).

We ask kindly you to note the following:

Operation of the heating

- The room temperature can be controlled by the wall thermostat in the kitchen area.

The garbage is disposed of **every Friday morning before 7:30 am**. We therefore ask you to place the garbage container (with the house number 79), which is located outside the vacation home, at the roadside the day before. After emptying, please put the container back to its place.
